**FINANCIAL CRITIC
OF LONDON POST
RAPS ALBERTANS**

LONDON, Aug. 7.—Contending that "More than one of the provincial governments of Canada have done their best to impair the credit of Canada as a whole," the Morning Post's financial critic today termed Alberta's new banking legislation "The final step calculated to destroy its own credit."

"Unless the federal government takes action it is impossible to see how the credit of Canada can fall to be affected," the critic wrote.

"The same is a strong feeling in the city of London's financial district that the Alberta challenge is one which the federal government cannot be expected to ignore."

The Manchester Guardian regarded the legislation as evidence Alberta's Social Credit movement is "becoming more scientific."

ABERHART DEMANDS HIS POST

Assent Given to 12 Bills In-
troduced At Special
Session

According to the demand of Premier William Aberhart, Hon. J. W. Huggill, K.C., has placed his resignation as attorney general and a member of the executive council in the hands of the Premier. Announcement to this effect was made on Saturday afternoon by Hon. Mr. Huggill.

Premier Aberhart and Hon. Mr. Huggill held a brief conference in the Premier's office during the Saturday noon hour, to discuss the date upon which the attorney general will relinquish his post.

Hon. Mr. Huggill, in tendering his resignation, notified the Premier he was complying with his request in so doing. Reason for this is that the attorney general had previously made arrangements to attend a meeting of the Canadian Bar Association, and he leaves on Saturday night to be in attendance.

It is likely that his actual relinquishing of office will be about the middle of September, with the Premier assuming the duties of attorney general in the meantime.

"I have little to say at the moment," declared Hon. Mr. Huggill. "Any statement I make on the situation will be made to my constituents after my return from the east and when I actually relinquish my office."

EXTREMELY SOBER
"It would also like to say that I am extremely sorry to leave a department so well-manned as this," he said.

He also had the fullest and utmost confidence in every man and woman in the department. All have given me their utmost loyalty and service. This is one of the most satisfying and gratifying features of my tenure of office and speaks highly for the efficiency of the Alberta Civil Service. I sincerely hope to return to it some day.

M'KEE CLEARED OF BLAME IN RELIEF WORK

Council Committee Sits To
Sift Charges Made By
Alderman Crang

Relief Manager H. F. McKee was absolved Friday of blame in reported over-payment of certain relief cases working under the city's existing work-for-wages program when a committee of council met to investigate the opinion of this alderman.

Commissioners were instructed to prepare a report on the plan which puts back of unemployed families to work for their relief allowance a 10 per cent cash bonus.

The work-for-wages program covers a variety of city work and has been in operation since last August. It was introduced by the city council in 1935.

In order to give the men an incentive to work, they were employed on what they had paid off their relief allowance. The program was introduced by the city council in 1935.

Centralization, As Suggested In Committee Report, Precipitates Debate Occupying Two Hours Of Final Session

Decision as to whether relief administration in Alberta will be centralized was stayed until the next session of the legislature, pending which members will be given opportunity of studying the effect of such action. This was the net result of a two-hour debate at the concluding sitting of the special session on Friday, when D. M. Duggan, Conservative leader and chairman of the special legislative committee investigating relief, submitted his report.

ALL BY PROVINCE
The main points featured in the recommendations, submitted by the Alberta Association of Municipalities, were that the relief administration be centralized under an independent body, and that the establishment of a cabinet minister and with three others on a committee, be recommended.

Mr. Duggan moved that the report and recommendations be considered. The committee was then asked to report on the recommendations.

NEEF INJUSTICE TO TAXPAYER THERE IS A TIDE

OUTSIDE GROUP TRIPLES MONEY REMOVING HERE

Newcomers Offer Knotty Problem to Civic Charity Committees

Another difficulty encountered in the knotty problem of relief administration was revealed Friday to the civic work-for-wages committee when Relief Manager F. McKee asked for a ruling on the scale of relief allowance which should be given unemployed families coming to Edmonton from outside municipalities. This question was asked for a further report.

The direct relief superintendent cited one case where a family formerly living in another municipality had come to Edmonton and obtained an annual relief allowance of \$800. It was explained that during the two years previous to coming to the city the yearly income of this particular family had been only \$200 and \$400, respectively.

Manager McKee declared it was obviously unjust to expect the taxpayers of Edmonton to pay indigent newcomers a relief allowance two or three times larger than that of former income.

He suggested that this class of unemployed be paid the provincial scale of relief or at a rate equal to the income which the recipient were to receive for the year prior to his coming to Edmonton. "This would prevent the present relief allowance from coming to Edmonton from outside points," Mr. McKee asserted.

Municipal Councils are not permitted to set for families leaving their home municipalities and coming to the city for relief. Mr. McKee also suggested that the relief be given to the person of relief.

The city council should not be asked to pay relief to persons who are not residents of the city. Mr. McKee declared that the relief should be paid to the person who is not a resident of the city.

PROVINCE C SWEET RELIEF PROBLEM—DUGGAN

New Policy Needed, Anslie, Committee Secretary, Declares

Continued from Page 1

relief. He was the most efficient administrator in the province through centralization and this would do away with lack of uniformity.

The job of the committee was not to find money but to find a need for it, he said.

He charged that if relief recipients get a job at less than they were receiving on relief, they should have the difference made up to them. If a person receiving \$20 a month relief, get a job at \$30 there should be some way of making up the difference, because if he got \$30 a month to live on relief, it would not be the same if the person was employed.

First Anderson, S.C. Calgary committee member, said the committee on the extent of its work, but he was afraid they had not got to the foundation of the trouble. "Why not get the facts to where it belongs," he asked. "Why not pass the law which controls this thing, today?"

SUPPLIES GRAIN

The committee met in Alberta there is a surplus of grain, mill, bread and other commodities and people were going without. He declared that these things should be distributed to the people in relation to their ability to pay, so the committee should be able to distribute them, but should be distributed according to their ability to produce.

He declared that in the legislation brought down at this session, the real root of the trouble had been reached.

Edith H. Gustick, S.C. Calgary, declared that it was an insult to the intelligence of the people of this province that such poverty and privation were allowed to exist in the province.

She said that "we all agree that the committee should be empowered for the welfare of the people there were no people here, the relief system that is responsible."

CONTROL OWN CREDIT

Mrs. Gustick emphatically declared that the people must control their own credit; that they must live in democracy and that they must roll up their sleeves and help the government achieve the results to which it was entitled.

Hon. Dr. W. W. Cross, minister of health and in charge of relief, agreed that relief was the greatest problem. He considered that the committee report required no consideration that had been given.

He pointed out that in A. MacKenzie, Alberta had the most efficient relief administrator in the province and had an opinion in writing on this point. The relief minister in charge of relief.

The department, he pointed out, would like to be in the position of being able to grant all requests for relief and not to have to say "no."

POINTS TO CLINIC

He directed attention to the dire problem involved and as an indication of the situation, he said that recently visited New Brighton had 45 undernourished children and found that 45 were underweight and 69 were undernourished. He said that figures showed that 32 per cent of the children in drought districts were suffering from malnutrition as a result of under-nourishment.

"It is not going to be increased under the present system, no one can show how it is going to be done without increasing taxation," he said.

Hon. Dr. Cross charged that relief was controlled by the banks and therefore the banks were responsible. He said that the banks on the side of the house felt they had the power to make the banks responsible for the relief.

Report of the committee was adopted and the speaker declared that "when the control of financial policy is in the hands of the government, we will immediately remedy conditions."

BUT NOT MONEY

The money said that until financial control was placed in the hands of the government, he would ask that relief administration be left to the hands of the banks and the bank would do all in its power to carry out the spirit of the report, but it could do nothing more.

He hoped that members would not be misled by the opinion of some headlines and would have the courage to stand up and do what they had been sent to the house to do. He declared that no woman, to his office, had got down her knees and begged him to support the legislation the government had brought into the house.

ALWAYS ATTENDED

Dr. Kester, Minister of Education, urged that the time had come when legislation on relief administration was desired and urged that the government if it would attend to purchasing, should have better prices.

BLAME SYSTEM

J. H. Brown, S.C. Edmonton, government, urged that the time had come when legislation on relief administration was desired and urged that the government if it would attend to purchasing, should have better prices.

Main purpose of the session was to amend the Social Credit Act as to facilitate workings of the Board appointed to establish the economic order in this province.

WITH ROYAL ASSENT

With Royal Assent given to this bill every banker in the province will now have to obtain a license to operate in the province by August 27. Although the bill provides for the license fee of \$100, it is estimated that the license fee will be \$30 on each employee, the government has stated that the purpose of the bill is not revenue-producing and it is financially impossible.

It was pointed out that the revenue-producing and it is financially impossible.

THIS CURIOUS WORLD THE MUSKELLUNGE

THE MUSKY, KNOWN ALSO AS THE FRESH WATER TIGER, HAS DOZENS OF DIFFERENT SPELLINGS OF ITS NAME. IT IS THE LARGEST AND MOST SAVAGE OF AMERICAN FRESH WATER FISHES.

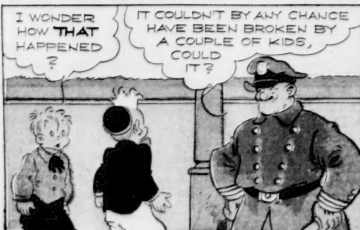

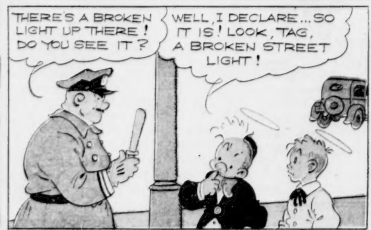

THE MUSKELLUNGE BELONGS TO THE PIKE FAMILY, AND OFTEN IS CONFUSED WITH THE GREAT NORTHERN PIKE. IT REACHES A WEIGHT OF 80 LBS.

ARMED WITH A SET OF SHARP TEETH, IT PREYS ON OTHER FISH, FROGS, SNAKES AND EVEN THE YOUNG OF WATER ANIMALS AND FOWLS.

FISHING FOR THESE WILY WATER TIGERS IS THRILLING SPORT, AND CATCHES OF 20 POUNDS ARE FAIRLY COMMON.
